"This bare summary of the book at least serves to indicate its scope. Its importance rests on the fact that there has never before been in English so detailed an examination of the men and their ideas, especially the *shishi*, who are too often dismissed as simple terrorists and fanatics. In consequence, this is a major contribution to the literature on the Meiji Restoration in Western languages, complementing the studies made by Norman, Jansen, and Craig."

"Harootunian, a talented and perceptive intellectual historian at the University of Rochester, has produced a first-rate study of the nature of the Meiji restoration and the political ideas that generated it. He challenges a number of accepted interpretations of the pivotal historiographical problem of whether the Meiji restoration was a revolutionary event. His answer, based on extensive use of primary sources, is that the restoration was, indeed, a revolutionary event or at least 'the result of revolutionary rage'."

"This is a superb book. Professor Harootunian undertakes the awesome task of untangling some very tangled lines of intellectual development in Japan in the thirty years preceding the Restoration of 1868. He succeeds with clear argument and felicitous style."

"In this stimulating and highly original study, Professor Harootunian discusses the early nineteenth-century debate in Japan over how to respond to the dual problem of 'disorder from within' and 'threat from without' ... He has portrayed with vividness and excitement an era in Japan's intellectual history which before seemed inordinately dull to this reader."

"This massive study is a sustained reading of the ideological dimensions of Tokugawa *kokugaku* ('nativist') discourse in both its genesis and reception. It is a prodigious accomplishment that moves far beyond studies that present intellectual history as a matter of schools of thought and teacher-disciple lineages. The study of textual production here is theoretically sophisticated drawing on, but not limited by, the best Japanese scholarship, and informed by the works of Bourdieu, Foucault, Ricoeur, Hayden White and others."

"Major contribution to the study of modern Japan. It builds on previous scholarship effectively and breaks new ground in an attempt to analyze the intellectual basis for the frenzied and largely successful activity of the leaders of Meiji Japan. Harootunian, well known in the field of Japanese studies has made excellent use of the available materials.... Viewed in the larger context of comparative intellectual history, a significant contribution to historical literature."

"Professor Harootunian has delivered his long-awaited study of the intellectual roots of the Meiji Restoration. It has been worth the wait. He has written an extraordinarily perceptive essay tracing the subtle evolution of thought that finally enabled men to see their way to a resolution of the basic political problem faced by Japan in the 1860's—how to free themselves from an obsolescent political structure."
